2005 Customer Satisfaction Survey
 Wellsite / Drilling Equipment & Materials

Stage Cementing Collar
 This widely accepted product combines an inflatable packer and a stage cementing collar into a singular unit. The tool is offered mechanically opened and hydraulically opened.
 Size range: 3.1/2" – 20"

Integral Casing Packer
 The ICP is a permanent, steel-reinforced packer that is run as an integral part of the casing string. The mandrel through the packer is the same size, weight, and grade as the casing.
 Size range: 3.1/2" – 22"

Pen-O-Trator Reamer Shoe
 Penetrates by reaming past obstructions with or without rotation, equipped with a profiled nose that has the ability to freely orientate off obstructions. Size range: 2.7/8" – 20"

Just Add Water.

SWELLFIX Swellable Elastomer Technology Begins to Swell on Contact of Water or Oil—Isolating Production Zones and Improving Well Efficiency

Swellable Elastomers: a dynamic, yet simple solution for zonal isolation and inflow control.

SWELLFIX is a global leader in swellable elastomers — a dynamic, yet simple solution for zonal isolation and inflow control in horizontal and vertical wells.

Our customers experience a significant improvement in their production **efficiency** — increasing output and decreasing water intrusion.

SWELLFIX offers failsafe **reliability** making it the natural choice for zonal isolation. Simple. Efficient. Reliable — SWELLFIX.

Leaders in Swelling Packer Technology

Total Installations to Date: More Than 5,000
